Table 1: Frequency of Tate Shafarevich group orders and types of rank 1 elliptic curves

Among the curves where the Tate Shafarevich order is still undetermined, one has the following bounds on their Tate Shafarevich order:

$\#\text{III}(E/\mathbb{Q})$	bound	Frequency
25		120
49		75
100		2
121		10
169		3
Total		210

Table 2: Frequency of Tate Shafarevich group order bounds of rank 1 elliptic curves
